

Questions from the community meeting Sunday May 31

- Who pays for this work?
- What is the long-term level of concern?
- What does cleanup look like – how will it be done?
- Where are you finding the high levels underground?
- What is benzene?
- Should we use the groundwater for irrigation or is it contaminating the yard / garden?
- Is there contamination in Canyon Creek?
- What are you finding in the air samples?
- When will you know about health effects / have a health message for us?
- How will you inform us when you have a health message?
